DETAILED ACTION

- 1) Acknowledgement is made of preliminary Amendment canceling claims 1-58.
Claim 59 is pending.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

- 2) Claim 59 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 3) Claim 59 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 59 provides for the use of recycled calcium carbonate, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 59 is a non-statutory claim since it includes the USE and the METHOD OF MAKING of recycled calcium carbonate.

Claim 59, in line 5, recites "can be formed" rendering the claim indefinite and unclear if the action is occurring.

Claim 59, in lines 5-6, the phrase "so small as to permit the particles to adhere to each other", renders the claim unclear as to the size of particles.

Claim 59 recites the limitation "the precipitated calcium carbonate" in lines 2-3; recites the limitation "the deinking process" in line 3; recites the limitation "the calcium hydroxide" in line 4. **There is insufficient antecedent basis for the limitations in the claim.**

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 4) Claim 59 is rejected under 35 U.S.C. 102(b) as being anticipated by Silenius

(EP 0 791 685). Silenius discloses a process wherein papermaking stock is mixed with calcium hydroxide and carbon dioxide in a reactor forming products that include calcium carbonate and water. The chemical reaction is disclosed as reaction (1) on page 4 of Silenius (pg. 3, line 33 to pg. 4, line 55). The particle size of formed calcium carbonate is not critical for the particles to adhere to each other.
